PROFILE SUMMARY

Founder's Office generalist with 2+ years operating at the intersection of strategy, research, automation, and execution. Currently the founder-facing operator at a market research firm — owning whatever ships that week, from CEO presentations to React prototypes to GTM decks to field-ops dashboards. Tech graduate (BCA) with deep cross-functional range across market research, business intelligence, product discovery, automation, marketing, and vendor management. Independently shipped two AI-native product concepts (real-time consumer panel platform, autonomous AI media house) demonstrating end-to-end product ownership beyond core role. Strong on Python, SQL, AI workflows, and turning ambiguous founder asks into shipped artifacts. Built for low-structure, high-ownership environments where range matters more than depth in a single function.

CORE SKILLS

Strategy & Operations: Founder's Office Operations, Business Strategy, Cross-functional Execution, Process Design, Hiring Coordination, Vendor & Client Management, Stakeholder Communication

Research & Analytics: Market Research (Quant + Qual), Consumer Insights, Business Intelligence, Competitive Analysis, Market Sizing, Data Analysis, Dashboarding (Looker Studio, Excel)

Product & GTM: Product Discovery, MVP Design, Feature Prioritization, Go-to-Market Strategy, Pricing & Positioning, Pitch Deck Construction

Tech & AI: Python, SQL, SDLC, DBMS, Generative AI, Prompt Engineering, AI Agents, Workflow Automation, Apps Script, React / Next.js

Marketing & BD: LinkedIn Marketing, Content Strategy, Lead Generation, Outbound Pipeline Design

Tools: Apollo, Miro, Jira, Trello, Figma, Notion, SQL, Python, SPSS, Looker Studio, Canva, MS Office, ChatGPT, Claude, Perplexity

PROFESSIONAL EXPERIENCE

Founder's Office • Brooksphere Research

Nov 2024 – Present

Faridabad, India

- Operate as the founder-facing generalist — own whatever needs shipping that week: long-form client decks, internal automation, CEO presentations, hiring funnels, and GTM artifacts; report directly to founders.
- Led 10+ end-to-end research engagements across appliances, FMCG, e-commerce, fantasy gaming, nutraceuticals, paper, and smart-home — covering concept tests, brand recall, UX research, mystery shopping audits, and feedback studies.
- Authored 200+ client-facing artifacts: research proposals (qualitative + quantitative), Q-commerce pitch decks with tiered engagement models, mystery shopping proposals covering multi-city retail audits, 2 pages insights from 10K Sample and long-form client reports up to 250+ slides.
- Built internal automation that materially compressed delivery cycles: Python-driven dynamic Gantt charts, Apps Script questionnaire auto-generators, HTML Google Form replicas, and dashboard-ready Excel transformations for field agent validation.
- Conducted strategic market intelligence across categories: pan-Asia paper market price analysis (India, China, Thailand, Indonesia, Gulf), nutraceutical, Metal, Water solution competitor mapping, and quick-commerce category sizing.
- Managed vendors, panel partners, hiring, finance coordination, and cross-functional execution; explored cloud file-management infrastructure (SharePoint, Google Shared Drive) for the team.
- AI-native operator end-to-end — Claude code / GPT for automation, dashboard development, prototyping, proposal drafting, qualitative synthesis, deck design, automation scripting, and code generation; reduced effort on knowledge work by 50–70%.

Project Coordinator • Logit Group, Inc.

Jul 2024 – Nov 2024

Noida, India

- Managed international stakeholder communication and execution tracking across multi-country research projects.
- Conducted manual testing and validation of in-house software workflows; authored user guides and operational documentation aligned with SDLC practices.

- Bridged leadership, product, and operations teams across initiatives; ensured data, process, and delivery quality throughout.

PROJECTS — BUILT & SHIPPED

Proposal & Pipeline Manager — Brooksphere Research

Built • Next.js / React • Vercel

brooksphere-proposal-manager.vercel.app

- Shipped an internal CRM-style web app for the firm's sales pipeline — proposal tracking, deal stages, and a live dashboard of pipeline value, win rate, lead sources, funnel, and stage distribution, plus follow-up and team views.

Finance OS — AI Personal Finance App

Built • Next.js / React • Vercel

personal-finance-delta-jet.vercel.app

- Built a full personal-finance application: expense / income tracking, budgets, debts & EMI, and goals, with an analytics + AI forecast layer, a bank-statement upload / import pipeline, and Google sync.

Survey Management System Prototype

Built • React

- React prototype with quota routing, screening and termination logic, and completion flows for research operations.

Automated LinkedIn Outreach Engine

In development

- Building an automation that sources prospects, personalizes messaging, and schedules outreach sequences — extending BSR's outbound BD pipeline.

CONCEPT PROJECTS

AI-Mapped Digital Consumer Panel Platform

Ongoing

Concept

- Owned strategic framing of an MVP for a real-time consumer panel using social-signal-driven recruitment — problem definition, competitive landscape, MVP scope, value-vs-effort prioritization, and GTM. Bet: speed, scale, and freshness beat traditional panels.

Fully Automated AI-Driven Media House

Ongoing

Concept

- Architected a multi-layer AI agent system automating the full content lifecycle — trend detection, ideation, generation, distribution, and feedback-loop learning. Thesis: the moat in AI content isn't generation; it's the feedback loop that learns.

EDUCATION

- **Bachelor of Computer Applications (BCA)** — Anand Engineering College • 2021–2024 • 75%
- **Intermediate (12th, Mathematics & Science)** — S.B.M.I.C. Shahajadpur, UP • 2018–2020 • 79%
- **High School (10th, Mathematics & Science)** — S.B.M.I.C. Shahajadpur, UP • 2016–2018 • 86%

CERTIFICATIONS

MySQL • Data Analytics • Microsoft Excel • Python Programming

ACHIEVEMENTS

- Silver Medalist — Techthon, a 7-day inter-college Tech + Management competition during graduation.
- State-level Squash Player.
- Volunteer, Kartavya — taught underprivileged children as part of a college outreach program.
